

Module 1: Student Discussion Activity: Create your first web page and share with peers

Create your first web page and share on discussion board

Let's begin the journey in applying what we have learned.

Now we are ready to start creating our first web page together and then share it with our peers on this discussion board.

Instructions:

1. Launch a Text Editor such as Notepad on the PC or TextEdit on a Mac.
2. Copy and paste the HTML code below into the document.
3. Add the text content within the opening and closing tags for the Title, Heading and Paragraph- See highlighted in yellow.
4. Save the document as a text only document with a file extension of .html on your Windows desktop.
5. Launch your web page through the browser by double clicking on the html document.
6. Click on the button below to watch the steps to create your first web page.

Step 1: Initial Post

1. Upload your HTML document as an attachment to the discussion board
2. Also, insert a screenshot the image of your web page.

Step 2: Peer Replies. **NOTE: This is required to receive a grade for this student exercise online discussion activity**

1. Please respond to at **least two** of your classmates web page in 50-100 words.
2. In your reply, note what stands out or intrigues you about their web page

Below is the HTML Code you will copying/pasting into your document:

```
<!DOCTYPE html>
<html>
<head>

<title>Enter your page title here</title>
</head>
<body>

<h1>Enter your page heading here </h1>
<p>Type 100-200 words of a short introduction of yourself or can be any topic or hobby you
would like to share to the class on your first web page</p>

</body>
</html>
```

For assistance in using a Text Editor to create your web page, click button below to view the steps in w3Schools.com

[NOTE: Instructions for Mac users to save TextEdit document as an HTML file](#)

Below is the sample of the HTML document and the content displaying in a browser:

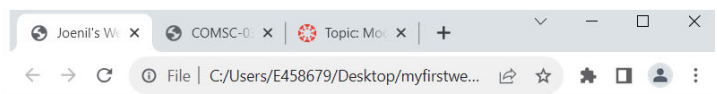

```
<!DOCTYPE html>
<html>
<head>

<title>Joenil's Web Site</title>
</head>
<body>

<h1>COMSC-30 Web Site Development Part 1</h1>

<p>My name is Joenil Mistal and I am very excited to be working with
you in designing and creating web pages in this introductory course.
We will be learning HTML 5 and Cascading Style Sheet CSS 3 and
understanding how these components play a critical role in building
web pages. During this course, we will apply the HTML 5 and CSS 3
language and concepts we'll learn by completing the hands-on lab
exercises in each of the learning modules.</p>

</body>
</html>
```

COMSC-30 Web Site Development Part 1

My name is Joenil Mistal and I am very excited to be working with you in designing and creating web pages in this introductory course. We will be learning HTML 5 and Cascading Style Sheet CSS 3 and understanding how these components play a critical role in building web pages. During this course, we will apply the HTML 5 and CSS 3 language and concepts we'll learn by completing the hands-on lab exercises in each of the learning modules.

Assessment & Feedback

Up to 20 points possible. The Discussion Board Rubric will be used to assess this activity. You can find the Rubric grading criteria by clicking on the three dots at the top right hand side of this page and selecting "Show Rubric".
